Current Research in Adaptive Cognition WS 2019/20 on Mondays 18-19:30h (F105)

Date	Speaker	Working Title of Presentation
21.10.19	Klaus Fiedler	Self-enhancement and suppression effects
28.10.19	Karolin Salmen	The Collectively Amplified Halo? Serial Backtranslation Between Verbal Traits and Behaviours
04.11.19	Lena Steindorf	About the nature of the wandering mind and how to capture it
11.11.19	Florian Ermark & Florian Kutzner	Collective rationality in Simpson's paradox
18.11.19	David Grüning	(Cumulative) Redundancy Bias - Trend and Comparative Environment as Important Factors
25.11.19	Franziska Bott, Mannheim	(Pseudo-)Contingency Learning and Choice Based on Information Sampling
02.12.19	Simon Stephan, Göttingen	What made this happen? A computational modeling approach to answering causal queries about singular cases
09.12.19	Hans Alves, Köln	Distributions of Trust: Majorities, Minorities, and Diversifying Societies
16.12.19	Cornelia Wrzus	Processes of personality development in adulthood
13.01.20	Nils Brandenstein	Belief in conspiracy theories - a machine learning approach
20.01.20	Tobias Vogel, Mannheim	The Architecture of Preference Acquisition: Typicality, Fluency & Valence
27.01.20	Celina Kacperski & Florian Kutzner	Drivers of the acceptance of autonomous and connected vehicles
03.02.20	Klaus Fiedler	Semesterabschlusstagung
